Registration

The "Register now!" page allows users to register on the site by filling in the "User ID", "New Password" and "Repeat Password" fields and click the [Save Account Information] button. Also helps to log in, if they already have an account by entering a username and password, by clicking the [Login] button. Users should be able to open the registration form, from the Login page by clicking the [Register Now!] button. After registration, the user is redirected to the main page. The registration form should consist of three blocks: "User Information", "Account Information" and "Profile Information".

User Information

The "User Information" section should contain 3 fields naming: "User ID", "New password" and "Repeat password". All required fields should be marked by asterisks.

User ID

- required field;
- should be unique;
- min 3 symbols;
- max 40 symbols;
- should accept Latin letters and digits;
- special characters and non-printing symbols are not allowed;
- no case sensitive.

New password

- required field;
- user shouldn't be able to copy from this field;
- user shouldn't be able to cut from this field;
- user shouldn't be able to paste from this field;
- should be covered by a mask;
- min 8 symbols;
- max 30 symbols;
- non-printing symbols are not allowed;
- should contain at least one special character;
- should contain at least one digit;
- should contain at least one capital letter.

Repeat password

- required field;

- the value should match the "New password" field.

Account Information

The "Account information" section contains the info about a user. It could be filled optionally during the registration process or after.

Email
- the format of the email is [name]@[domain].[top-domain];
- should contain a minimum of 14 symbols;
- should contain a maximum of 72 symbols;
- [name] part accepts Latin letters, digits, and some special characters: plus (+), hyphen (-), underline (_), dot (.);
- should be unique;
- optional field.

Phone
- should have a placeholder: *+38 000 0000000;*
- the number should start from the plus;
- letters are not allowed;
- special characters and non-printing symbols are not allowed.

Profile Information

This section contains optional additional information about preferences about the user account. Language available options: EN, ES, UK, JP. In the Favourite Category, the user is able to select one favorite category on the site to take emails with discounts in the selected category. Users should be able to select fish, Dogs, Cats, Reptiles, and Birds categories. An 'Enable MyBanner' checkbox is checked by default.

Validation

A confirmation information message should be displayed to register with an already registered user ID. If some of the mandatory fields are not filled in, these fields should be marked in red. For another check, one message should appear: "Check Error! Check that all required fields are filled with valid data.".
